Actionable Insights for Everyone on Your Team

KYP.ai fills every data gap in your organization by capturing and identifying how processes, tasks, and the human elements of your workforce can achieve peak efficiency with sustainable outcomes.

Key Features

- Process Intelligence: Map how work actually gets done across systems and teams.
- Automation Discovery: Identify high-impact automation opportunities with AI.

Why KYP

- **Automated Data Capture**: Full visibility into work across people, processes, and tech.
- **AI Concierge**: Instant, intelligent answers from aggregated data.
- **Real-Time Intelligence**: Pre-built dashboards turn data into actionable insights.
- **Autonomous Enterprise**: AI-driven recommendations to boost productivity and impact.

Over 65% of digital transformation efforts fall short due to lack of visibility into how work truly gets done. Without clear insights, inefficiencies thrive. Intelligent process mining and automation are now critical to unlocking sustainable performance and ROI.

Value Delivered

- **Accelerates** transformation with real-time insights
- **Boosts efficiency** by eliminating process waste
- **Enables** data-driven decisions at every level
- **Optimizes costs** without sacrificing performance
- **Enhances** workforce productivity and focus

Best applicable

- **Finance Operations**: Optimize invoice processing, reporting cycles, and shared services efficiency.
- **Customer Service & Support**: Identify tool usage patterns and reduce handling time.
- **IT & Shared Services**: Improve help desk productivity, identify legacy inefficiencies.
- **Digital Transformation Leaders**: Gain transparency across the tech stack to drive strategic decisions.
- **COOs & CIOs**: Drive continuous improvement and automation with enterprise-wide visibility.
