proservartner

Master Data Optimisation

Vendor data cleansing, validation and fraud prevention. Fully integrated

Proservartner is a transformation adviser to Finance, Procurement and GBS leadership, with deep specialism in Master Data Management and Procure-to-Pay. With 100+ practitioners, 91 AI and automation partners, and 15+ years average team experience across Europe, the Middle East, Asia, North America and LatAm, we connect strategy, data governance and AI-powered execution — partnering with Trustpair — to deliver measurable fraud prevention, working capital and operational outcomes.

OUR MASTER DATA CAPABILITY — 10 SERVICES, ONE INTEGRATED OFFER

01 Strategy & Operating Model

Define a clear Master Data vision and operating model — governance, ownership and data stewardship aligned to Finance, Procurement and P2P priorities.

02 Diagnostics & Benchmarking

Vendor master data health checks, duplicate analysis and maturity assessments to quantify the cost of poor data and prioritise the highest-value fixes.

03 Data Cleansing & Enrichment

Remove duplicates, retire obsolete records and enrich supplier profiles with trusted external company and banking data for complete, reliable master files.

04 Bank Account Ownership Validation

Automated, real-time validation of vendor bank account ownership across 200+ countries — preventing payment redirection, supplier impersonation and CFO fraud.

05 Automation & AI Enablement

Embed Trustpair into ERP, TMS and P2P workflows so validations, monitoring and alerts run continuously — reducing manual checks from 30+ minutes to seconds.

06 ERP Integration & S/4HANA Readiness

Pre-migration data audits and clean vendor onboarding for SAP S/4HANA, Oracle, Workday and others — preventing legacy risks from being carried into the new ERP.

07 Controls, Compliance & Audit

Strengthen SOX, internal audit and regulatory controls with verifiable audit trails, segregation of duties and continuous third-party monitoring.

08 Change Management

Structured change approaches for Procurement, AP, Treasury and MDM teams — embedding new processes, engaging stakeholders and building internal ownership.

09 Training, Coaching & Upskilling

Tailored programmes for MDM stewards, AP teams and Treasury covering data quality, fraud awareness and platform adoption to sustain long-term performance.

10 Surge Resourcing

Experienced MDM and P2P practitioners to manage cleansing backlogs, support deployments and maintain business continuity during transformation.

The four Master Data value pillars we transform with Trustpair

VENDOR DATA QUALITY

Cleansed, deduplicated and enriched supplier records — a single source of truth.

ACCOUNT OWNERSHIP

Automated bank account validation in 200+ countries before payments execute.

CONTINUOUS MONITORING

Real-time alerts on supplier or banking data changes across the vendor lifecycle.

FRAUD PREVENTION

Block CEO, CFO and vendor impersonation fraud at the source — not after the loss.

CASE STUDIES — RESULTS DELIVERED THROUGH VENDOR DATA TRANSFORMATION

GLOBAL MANUFACTURER | *Manufacturing* | Vendor Master Cleansing & Validation

Cleansing a 60,000-record vendor master ahead of S/4HANA migration to eliminate duplicates, retire obsolete records and validate banking data.

22%	100%	€1.8M	Clean
Reduction in active vendor records	Bank accounts validated pre go-live	At-risk payments intercepted	S/4HANA go-live with zero legacy fraud risk

INTERNATIONAL RETAILER | *Retail* | Fraud Prevention & P2P Controls

Embedding automated account ownership validation and continuous monitoring across a multi-entity, multi-currency procure-to-pay landscape.

0	95%	30 min → secs	190+
Successful fraud incidents post go-live	Reduction in manual vendor checks	Per-vendor validation time	Countries covered by automated checks

EUROPEAN ENERGY GROUP | *Energy & Utilities* | MDM Governance & Operating Model

Standing up an MDM governance framework with embedded data stewardship, continuous monitoring and SOX-aligned controls.

40%	SOX	Single	Real-time
Faster vendor onboarding cycle time	Audit-ready controls and trail	Source of truth across 12 ERPs	Alerts on supplier data changes

WHY PROSERVARTNER

Deep MDM & P2P Experience

- Specialists with 15+ years average experience
- Cross-industry, Big 4 and SI backgrounds
- Practitioners — not just advisers

Functional & AI Knowhow

- 91 AI and automation partners
- Finance, Procurement, HR, IT and Ops
- Helped a wide range of enterprises take the next step

Global Reach

- Europe, Middle East, Asia, North America and LatAm
- Multi-jurisdiction transformations
- Big enough to deliver, small enough to care

Practical & Results-Focused

- Focused on ROI and performance
- We don't just deliver — we teach as well
- Straight-talking, value-for-money

Because in the end, every insight, every transaction, and every customer interaction depends on a single foundation: trusted master data.

AI will only ever be as intelligent as the master data that underpins it.
